Share the Food

Team name:Breaking bad
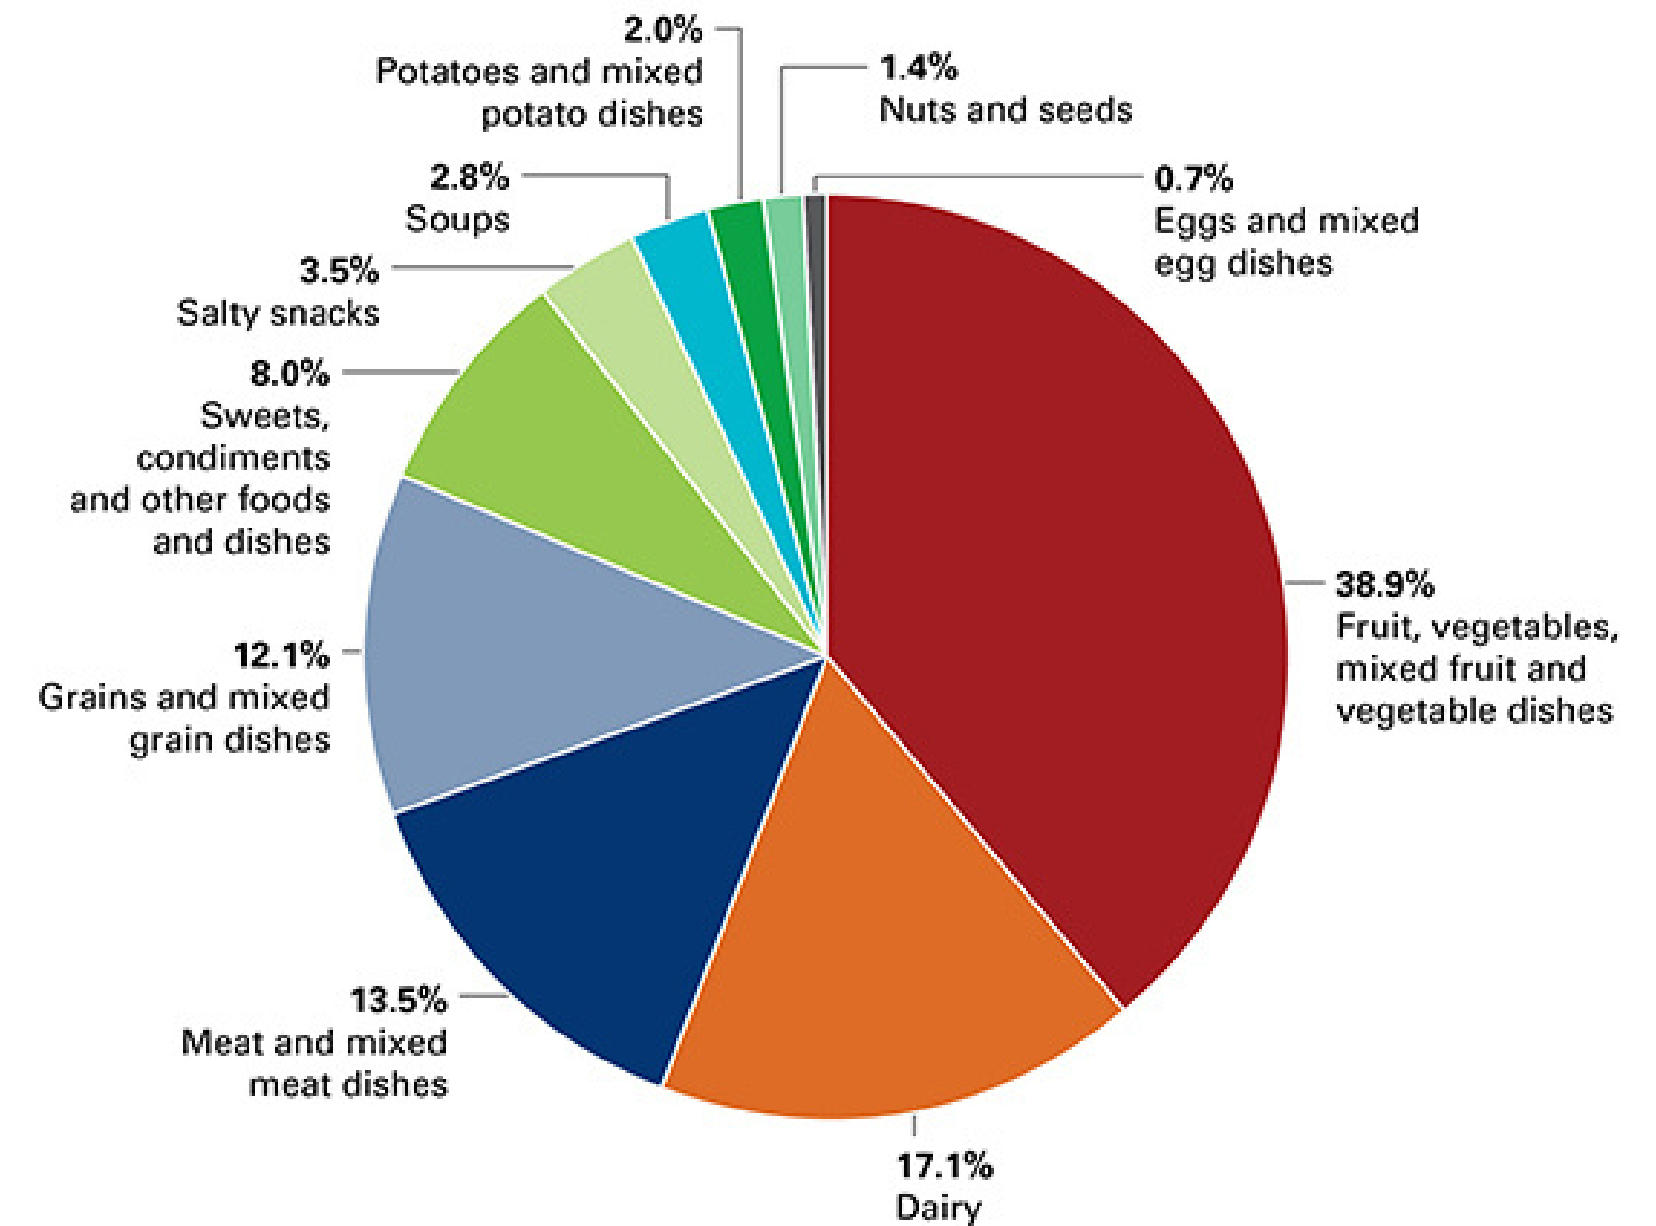

Team members:Duane,Isaiah,Joshua

Problem Statement:

Develop an app or platform that connects users with local food banks or other organizations to donate unused food items. The app could also offer tips for reducing food waste at home and tracking the environmental impact of reducing food waste.

Explaining the problem:

Food waste is a significant problem that affects both individuals and the environment.

Python
Flask
MySQL

Our Solution

A web platform for users to donate cooked or raw ingridients for the benifit of those who are in need by connecting them to the nearest foodbank.

Unique Features

Checkpoints of Food banks on Google Maps

Challenges To Overcome

- Lack of awareness

- Inefficient supply chain

- Consumer behavior

- Food labeling and expiration dates

Thank you!
